

# Evolution of AMS-IX LAB

30<sup>th</sup> June 2023 - NLNOG bbq-day

[eric.nguyenduy@ams-ix.net](mailto:eric.nguyenduy@ams-ix.net)

# AMS-IX LAB ... what for ?

*Proof of Concept*

*Research*

*Equipment Testing*

*Software Development*

*Engineers training*

*also for photo-op*

# The Era

# The Scale

# The Achievements

# The eras

*Beginning at Westeinde 12 (WE12)*

**2010**

**2000**

*Move to Frederikpleins 42 (FP42)*

**2018**

**2014**

*Expansion to DRT*

**2021**

2000 - 2010

# 2000 to 2010

*Genesis of both AMS-IX B.V. and  
Exchange platform*

*There were a single team of 7 to 8 people  
handling the technical operation &  
development*

*AMS-IX office was at only Westeinde 12  
but later on expand to Westeinde 14*

*WE12 LAB is born*

# 2000 to 2010

## Scale

WE12

*WE12 lab circa 2003 ...*

*MG8 = "Mucho Grande" 8*

2005

*How to move big switch down Amsterdam-style stair ...*

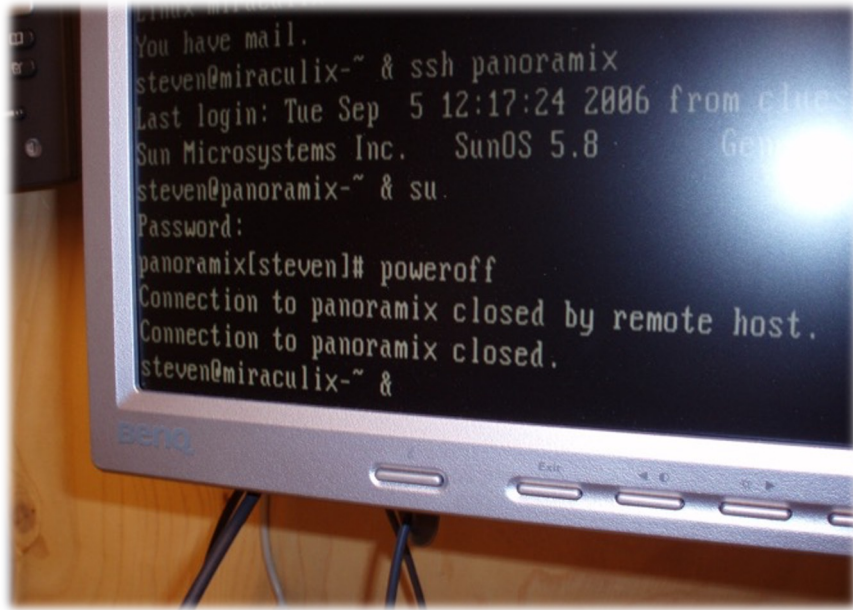

2005

servers in 2006 ...

*new generation of equipment in 2007 ...*

# 2000 to 2010

## Achievements

*Change from Cisco to Foundry BigIron and later on MLX platform*

*Implementation of platform redundancy with VSRP & Glimmerglass Photonic deployment*

*Switch over from plain layer-2 switching to MPLS/VPLS in 2009*

*Netflow statistic collector library Net::sFlow & statistic tools*

*Crucial internal software like XML, M6::CfgDB library, PXCD*

*1st version of my.amsix.net portal*

2010 - 2014

# 2010 to 2014

*AMS-IX office expanded to Westeinde 16*

*More people joining AMS-IX tech team to handle the workload*

*Start with 24/7 NOC*

*Deployment of remote Exchanges in Hong Kong and USA*

# 2010 to 2014

## Scale

WE12

*More equipment ... more cable spaghetti (2012)*

*Cisco route-server test 2012 ...*

## flooded and overheated lab did happen

### Water leak from the A/C in the lab @ office

o Kostas Koutalis <[redacted]>

Wednesday, 3 October 2012 at 14:18

To: o AMS-IX Tech; o AMS-IX Receptie

! This message is high priority.

As Bart & I noticed, there's a water leak in the A/C next to the door in our lab. We cleaned the lab & left 2 buckets underneath the leaking points.

I contacted Poolster (023 - 525 3780) and they will send someone over tomorrow morning to check it. Unfortunately they can't make it today so let's just hope that the buckets won't get filled with water.

Please whoever is the last that will leave the building today & the first to come in tomorrow, empty both buckets and place them again under the leaking points.

Kostas

Konstantinos Koutalis

### AMS-IX's private sauna/ (a.k.a. LAB)

o Kostas Koutalis <[redacted]>

Thursday, 10 October 2013 at 17:10

To: o AMS-IX NOC; o Ariën Vijn / AMS-IX Engineering

Is anyone using any of the MLX's in the lab?

If yes, please let me know ASAP. Else in about 1 hour I'll start powering off some things and hopefully the temperature will drop a bit.

Kostas

# 2010 to 2014

## Achievements

*Implement of 100G in AMS-IX platform*

*100G SOA amplification Proof of Concept*

*First revision of auto provisioning & engineering grapher*

*Route server benchmarking (BIRD/Cisco/OpenBGPD)*

*BIRD & Cisco route-server deployment*

*Check\_MK introduction*

*NOC tools like Ispctl, quickdebug v2 ... etc*

2014 - 2018

# 2014 to 2018

*AMS-IX office moved to **Frederiksplein 42***

*A brand new lab with more space*

*FP42 LAB was born*

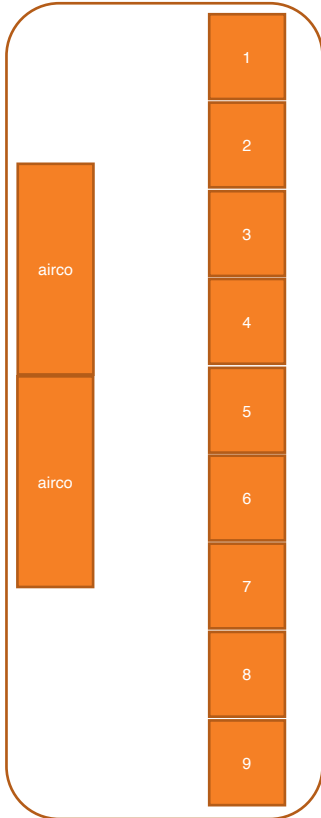

# 2014 to 2018

## Scale

FP42

WE12

*bye bye WE12 ...*

*FP42 lab build out (2014) ... trying to  
setup proper patch cabinet to avoid  
cable spaghetti*

... almost fully occupied (2022) .. cable spaghetti is unavoidable though 😊

# 2014 to 2018

## Achievements

*SLX9850 platform testing*

*ADVA 100G (4x28G ) DWDM solution*

*200G coherent DCI Proof of Concept test with Huawei/Adva/Coriant/Ciena*

*100G PAM4 test*

*1<sup>st</sup> Glimmermaxx prototype*

*AMS-IX management network POC test with Dell/Pluribus*

*Improved provisioning test end-to-end*

*qNOC tools*

*Megaport integration, a precursor for OSS API*

2018 - 2021

# 2018 to 2021

*Fix the Basic*

*3rd party developers outsourcing & paradigm shift in development*

*More development for IXaaS, Salesforce, IXAPI & automation*

# 2018 to 2021 Scale

FP42

WE12

*cabinet number 1 ... the brain of the lab*

*LAB VMs (i.e. trialix)*

*gitlab runner CI/CD*

*SoftDev test bed  
(ABS/GGD/IXAPIv2) base  
on Docker*

# 2018 to 2021

## Achievements

*No-XML phase 1*

*First IXaaS deployment & IXaaS v1.2 software stack (Docker base)*

*Introduction of CI/CD (Gitlab)*

*route-server RPKI*

*2nd Glimmermaxx prototype*

*New optical DCI test*

*Salesforce development leading to ams-ix.me release*

2022 ...

# 2022 ... to the future

*Emerging from COVID-19*

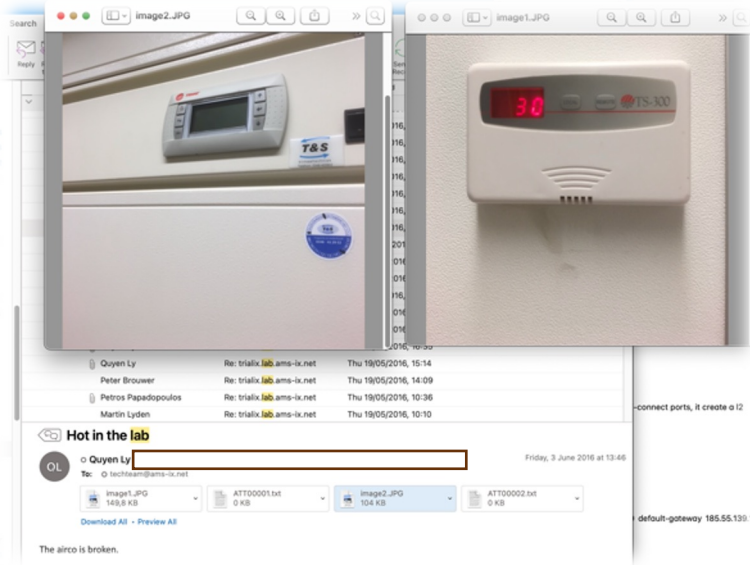

*Plenty of 2022 business objectives*

*AMS-IX LAB expands to Digital  
Realty Tower (DRT) Science Park*

*Ready for Juniper equipment*

Lab look fancier but facility quality is a bit below par.  
And still get overheated & flooded ☹️

The screenshot shows an email interface with a thread of messages. The most recent message is from Quyen Ly, dated Friday, 3 June 2016 at 13:48, with the subject "Hot in the lab". It contains two attachments: "image1.JPG" (143.8 KB) and "ATT00001.txt" (0 KB). Below the email, the text "The airco is broken." is visible. Above the email, two photos of a thermostat are shown. The left photo shows the thermostat on a wall with a "T&S" sticker. The right photo is a close-up of the thermostat's digital display, which shows "30" in red.

### Airco @ HQ LAB out of order

19/02/2022

We have been called by Trigion that there were burglary alarms at the building. I requested from Trigion to send a patrol and check. The patrol crew found out that the door at the HQ LAB was suspiciously hot, they reported that they could not even touch the door handle. There was no fire smoke, but there was a strange smell and the temperature was too hot. I went onsite, I opened the door of the HQLAB and the temperature was approximately 50 degrees.

### 20170420 - Incident Reports: FP42 Server Room is flooded

Created by Eric Nghia Nguyen-Duy, last modified by Konstantinos Prantzos on 28 Oct 2020

#### Evidence

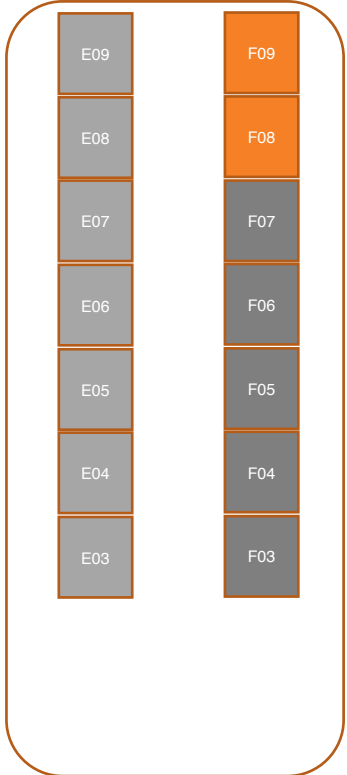

2022 ... to future  
New testbed at our core location dedicate to  
softdev team, no more accidentally removed ports

FP42

Digital Realty Sciene Park

WE12

# 2022 ...Achievement

*More stable testing platform for our softdev team*

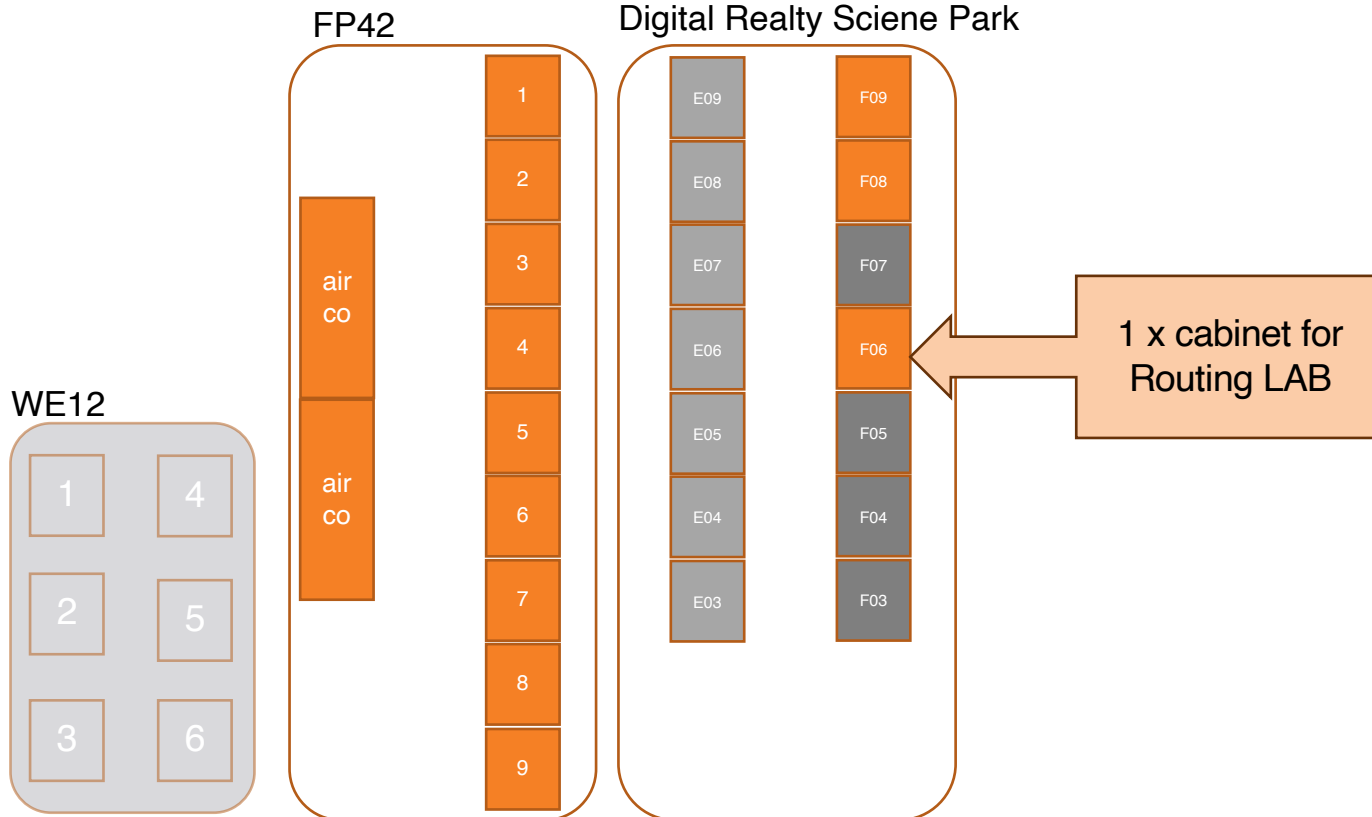

*We were able to fasten up our Salesforce integration and prepare for Juniper integration*

*Our developers are much happier .. No-one accidentally pull out fiber or remove transceiver from port any more !*

2023

# Routing LAB in DRT

- A virtualisation cluster for testing Route Servers
  - Consists of 7 Dell servers
  - Aiming to virtualise 1000+ BGP speakers
  - Test different Route Server implementations
    - Bird 2/3, OpenBGPD, etc.
  - Test new RS features (e.g. RTBH)
  - Test Support tools (e.g BirdWatcher, Alice-LG)

# Juniper MX10008 & GlimmerMaxx in FP42

**1st Juniper MX10008 box integrated to the FP42 LAB**

**1st production ready prototype of our optical relay switch Glimmermaxx**

# Q & A
